RE: TIGER ONE SPRs

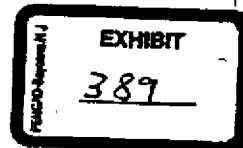

Mike,

Attached is more information on SPR # 356740 from Computer Type.
In addition, I would like to have SPR # 357033 left open as an
enhancement request (which it originally was). Although FORMAT
does provide several means of specifying volume to be created,
they are not as "user friendly" as the proposed /C. Or, better
still, use a /V:(size) which would be compatible with DOS 4.0.

This is the latest batch of Tiger One SPRs.

SPR #	Description	Rev	Ver
356427	EDITOR should display row position	0	Beta 2
659227	Gets "disk full" msg when > 4300 files on disk	3	Beta 2
658228	SYS B: A: reads system from C:, not B:	1	Beta 2
658229	Novell login fails if LASTDRIVE in CONFIG.SYS	3	Beta 1
658230	FDISK will not permit an empty volume label	1	Beta 1
658231	DISKCOPY fails with Award 286 BIOS	2	Beta 1
658232	Error msg do not go to STDERR w/ file redirect	2	Beta 1
658233	CTRL-BRK will not exit CHKDSK /a	1	Beta 1
658234	DIR does not work same as DOS ra: file extensions	1	Beta 1
658235	COMP offset incorrect when files do not match	2	Beta 1
658236	I/O error reading A: when loading from Bernoulli	1	Beta 2

Cheers!
